# RANDOM

Designed by Neuland Industriedesign

A bookcase made of 6 mm thick MD-wood fibreboards, microglossed lacquer in white. By flanking more units, also with the new Random Box or Random Cabinet, large-sized configurations of strong impact can be created.

BOX A, B and C

The new decoration elements are inspired by modern artworks to add colour and functionality to some modules of Random bookcase. Boxes coated in artificial fibre canvas.

## FRAMEWORK

Back of melamine - coated board (thickness 10 mm). Shelves at various standard heights, fit into the backs through concealed slots. Adjustable feet. Ready for wall mounting.

# Finishing

## BOOKCASE

---

### Structure

Matt lacquered

## BOX A - B - C
